HOW TO READ IT

Platform and locker

- Platform width and depth should cover the inflated size, with room to step around it.
- The locker opening must clear the packed size. Check the smallest dimension of the opening first.

Davit and load

- Davit capacity must exceed boat weight plus motor, battery or fuel, and anything left aboard.
- Your total load from page 1 must stay under the max capacity.

Weights above are the boat only. Check your davit maker's rating and your yacht builder's limits for the platform; those numbers govern, not this sheet.

THREE JOBS, ONE BOAT

Yacht tender
Shore runs, the mooring ball, dinner ashore.

Shadow boat
Follows the day and handles lines, anchors, crew and guests.

Shuttle
Crew, guests and gear between the boat and the dock.
